CANDIDATE NUMBER

COMBINED SCIENCE **0653/33**

Paper 3 Theory (Core)   **October/November 2025**

1 hour 15 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS
- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.
- You should show all your working and use appropriate units.
- Take the weight of 1.0 kg to be 9.8 N (acceleration of free fall = $9.8 \, m/s^2$).

INFORMATION
- The total mark for this paper is 80.
- The number of marks for each question or part question is shown in brackets [ ].
- The Periodic Table is printed in the question paper.

This document has **20** pages. Any blank pages are indicated.

**1 (a)** Fig. 1.1 is a diagram of an animal cell and a plant cell.

animal cell   plant cell

Fig. 1.1

Table 1.1 shows information about some of the parts labelled in Fig. 1.1.

Complete Table 1.1.

Table 1.1

name of part	letter of part	function of part
....	**E**	control of cell activities
mitochondria	....	....
chloroplast	....	photosynthesis

[4]

(b) Chloroplasts are needed for photosynthesis.

(i) Name the **two** raw materials used in photosynthesis.

1 ....

2 ....

[2]

(ii) Energy is needed for photosynthesis.

State the source of this energy.

.... [1]

(c) Photosynthesis is needed for growth in plants.

Scientists measure the heights of two plants, **X** and **Y**, for 40 days.
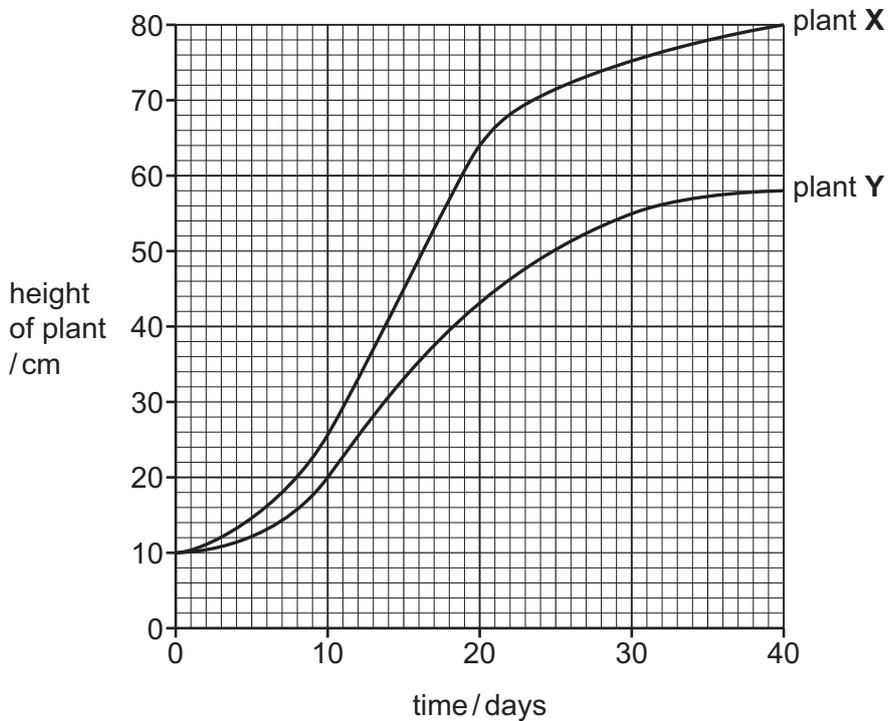

Fig. 1.2 is a graph of the results.

Fig. 1.2

(i) Calculate the difference in height between plant **X** and plant **Y** at 30 days.

difference in height = ... cm [2]

(ii) Identify the days when the growth rate of plant **X** was the fastest.

Place a tick (✓) in the correct box.

0 to 10 days   ☐

10 to 20 days   ☐

20 to 30 days   ☐

30 to 40 days   ☐

[1]

[Total: 10]

**2** **(a)** Fig. 2.1 is a diagram of the female reproductive system in humans.

Fig. 2.1

(i) Name the part labelled **Q** in Fig. 2.1.

.... [1]

(ii) Draw a line labelled with the letter **V** to identify the vagina in Fig. 2.1. [1]

(b) Describe how the thickness of the uterus lining changes from day 1 to day 28 of the menstrual cycle.

....

.... [1]

(c) **(i)** Complete the sentences about blood vessels.

The human circulatory system contains three main types of blood vessels: arteries, veins

and ....

Arteries have thicker walls than veins, but veins have a ....

with a larger diameter.

Veins have .... to ensure the one-way flow of blood.

[3]

(ii) State the component of blood that transports oxygen.

.... [1]

(d) Iron and calcium are needed as part of a balanced diet.

    (i) Circle **one** principal source of iron.

                apples   **milk**   **nuts**   **vegetable oil**

                                                                                    [1]

    (ii) State the dietary importance of calcium.

       ....

       .... [1]

                                                                            [Total: 9]

3 Tigers are endangered animals that live wild only in parts of Asia. Tigers catch and eat many different animals.

(a) (i) Table 3.1 shows some information about the number of tigers that live wild.

Table 3.1

year	estimated number of tigers that live wild
1900	100 000
2000	3500
2020	4500

Suggest **two** reasons for the difference in the number of tigers between 1900 and 2000.

1 ....

2 ....

[2]

(ii) Circle all the words that describe the tiger.

carnivore   **consumer**   **decomposer**

herbivore   **producer**

[2]

(b) Tigers are part of an ecosystem.

(i) Circle **two** words in **bold** to give a correct description of an ecosystem.

An ecosystem is a community of **habitats / organisms** and their

climate / environment, interacting together.

[1]

(ii) State the word that describes the number of different species that live in an area.

.... [1]

(c) Tigers have a similar alimentary canal to humans.

The flow chart in Fig. 3.1 shows the direction that food moves as it passes through the alimentary canal.
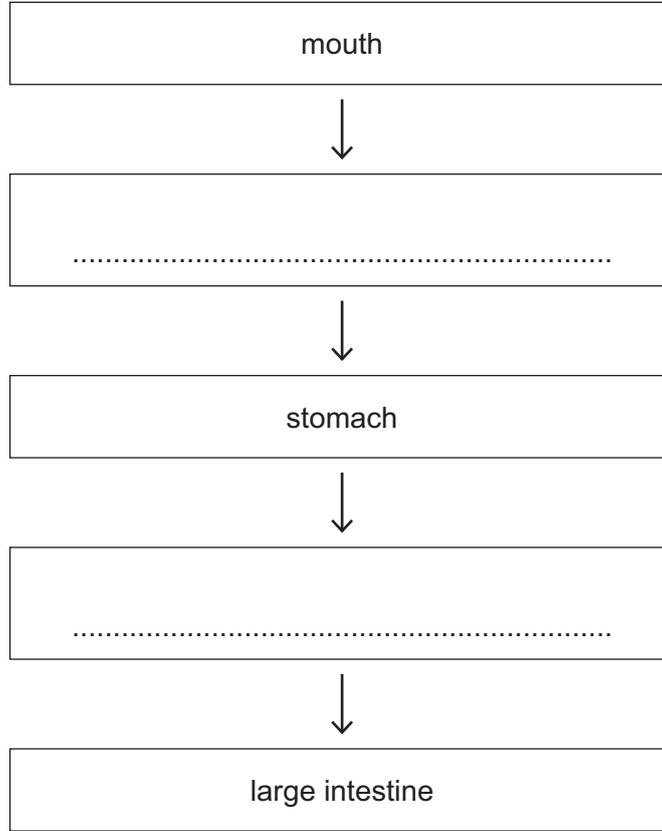

Complete Fig. 3.1.

Fig. 3.1

[2]

[Total: 8]

4 A student investigates the reaction between magnesium and steam.

Fig. 4.1 is a diagram of the apparatus used in the investigation.
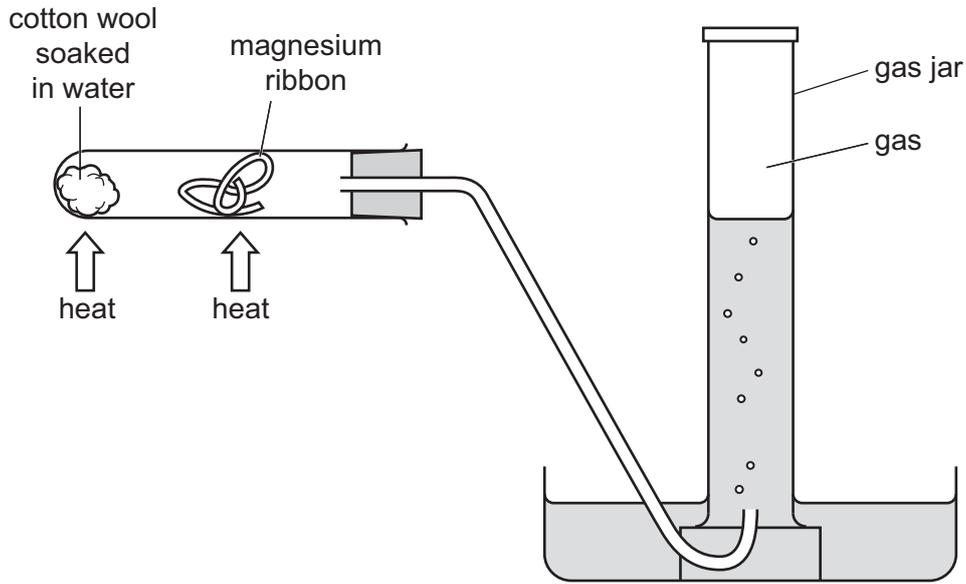

Fig. 4.1

(a) The reaction produces magnesium oxide and a gas.

(i) Complete the word equation for this reaction.

						magnesium oxide		

+ $\longrightarrow$ +

[2]
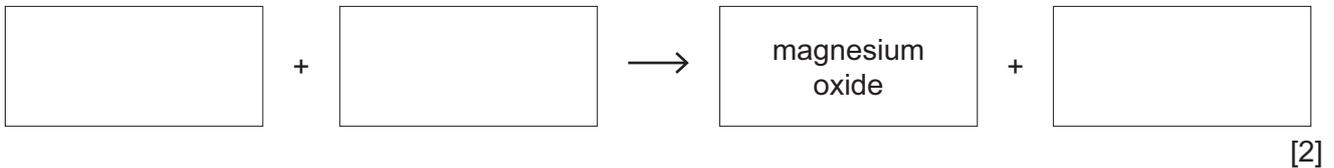

(ii) The gas jar in Fig. 4.1 collects the gas, but it does **not** allow the volume to be measured directly.

Name **one** piece of apparatus that allows the volume of gas to be measured directly.

.... [1]

(iii) Complete the sentences about the reaction of magnesium with steam.

Use words from the list.

Each word may be used once, more than once or not at all.

anions	**cations**	**covalent**	**electrons**	**ionic**
neutrons	**neutralisation**	**oxidation**	**protons**	**reduction**

During the reaction, magnesium atoms lose .... to form

positive ions.

These positive ions are known as ....

Oxygen atoms from the water molecules form negative ions.

Positive ions and negative ions attract each other and form ....

bonds.

During the reaction, magnesium atoms gain oxygen. This type of reaction is

....

[4]

(b) The student repeats the experiment using copper instead of magnesium.

Predict what the student observes during the reaction.

Explain your answer.

observation ....

....

explanation ....

....

[2]

[Total: 9]

5 **(a)** Fig. 5.1 shows an organic compound.
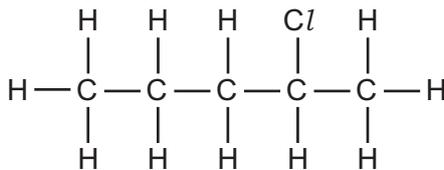

Fig. 5.1

   (i) Deduce the molecular formula of the organic compound shown in Fig. 5.1.

   .... [1]

   (ii) Explain why the organic compound shown in Fig. 5.1 is **not** a hydrocarbon.

   ....

   .... [1]

(b) Fig. 5.2 is a diagram of the chemical structure of ethene.
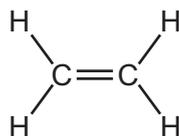

Fig. 5.2

   (i) Name the group of hydrocarbons to which ethene belongs.

   .... [1]

   (ii) Complete the symbol equation for the complete combustion of ethene in the presence of oxygen.

   $$C_2H_4 \ + \ ....O_2 \ \rightarrow \ ....CO_2 \ + \ ....H_2O$$

   [1]
   (iii) Complete the sentences about poly(ethene) using **one** word in each gap.

   Poly(ethene) is a polymer made from ethene. Polymers are large molecules built up from

   many smaller molecules called .... The formation of poly(ethene) is

   an example of .... polymerisation.

   [2]

   [Total: 6]

BLANK PAGE

6 **(a)** Fig. 6.1 shows Group I of the Periodic Table.

3   **Li**   lithium   7
11   **Na**   sodium   23
19   **K**   potassium   39
37   **Rb**   rubidium   85
55   **Cs**   caesium   133
87   **Fr**   francium   –

Fig. 6.1

(i) Write a **number** in each gap to complete the sentence.

An atom of potassium contains .... protons and .... neutrons.

[2]

(ii) The electronic configuration of a potassium atom is 2,8,8,1.

State **two** ways that the electronic configuration is related to the position of potassium in the Periodic Table.

1 ....

....

2 ....

....

[2]

(iii) Complete Table 6.1 with information about an electron.

Table 6.1

	relative charge	relative mass
proton	+1	1
electron		

[2]

(b) Fig. 6.2 shows the reaction of potassium with water.
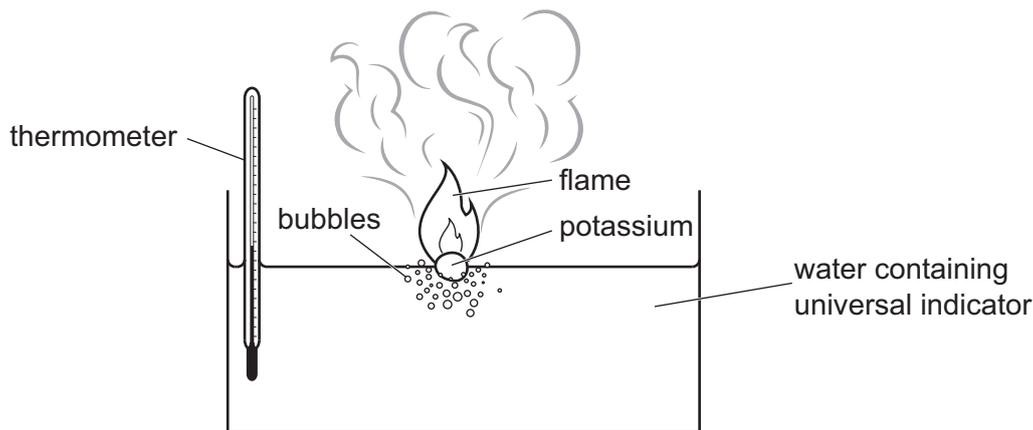

Fig. 6.2

(i) State the flame test colour for potassium.

.... [1]

(ii) A gas is produced during the reaction.

Describe a test to identify the gas.

Give the observation for a positive result.

test ....

observation ....
[2]

(iii) The temperature of the water increases during the reaction.

Name the type of reaction that causes an increase in the temperature of the surroundings.

.... [1]

(iv) The universal indicator turns purple during the reaction.

Suggest the pH of the solution formed during the reaction.

pH = ... [1]

[Total: 11]

7 A student wants to determine the density of a liquid.

(a) Fig. 7.1 shows the equipment the student uses to measure the volume and the mass of the liquid.
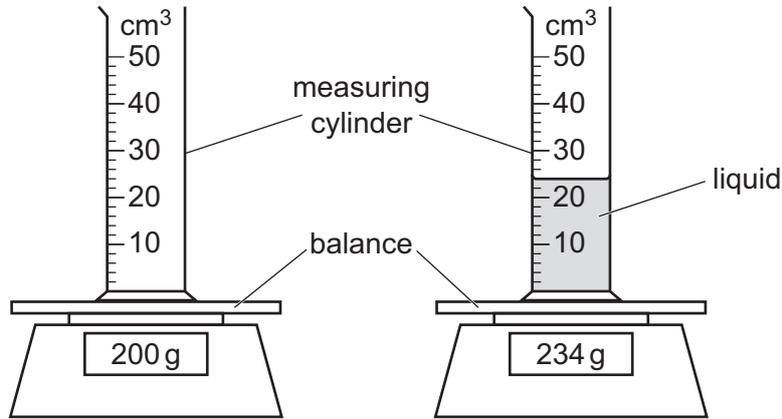

Fig. 7.1

(i) Determine the volume of the liquid.

volume = ...cm³ [1]

(ii) Determine the mass of the liquid.

mass = ...g [1]

(iii) Calculate the density of the liquid.

Include the unit in your answer.

density = ... unit .... [3]

(b) Some of the liquid evaporates from the measuring cylinder.

Describe the process of evaporation.

Use ideas about particles in your answer.

....

....

....

.... [2]

[Total: 7]

8 **(a)** Fig. 8.1 shows a ray of light reflected by a plane mirror.
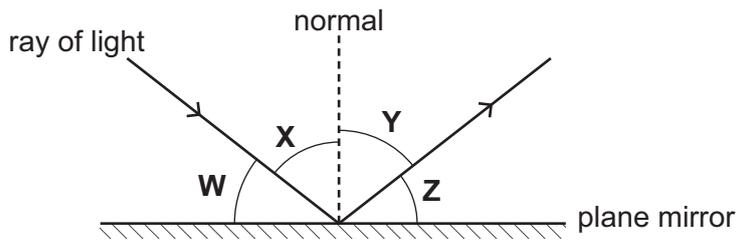

Fig. 8.1

(i) Tick (✓) **one** box to show the name of angle **X**.

angle of dispersion ☐

angle of incidence ☐

angle of reflection ☐

angle of refraction ☐

[1]

(ii) Angle **W** is 30°.

Determine the size of angle **Y**.

angle **Y** = ...° [1]

(b) A ray of light in air enters a glass block, as shown in Fig. 8.2.
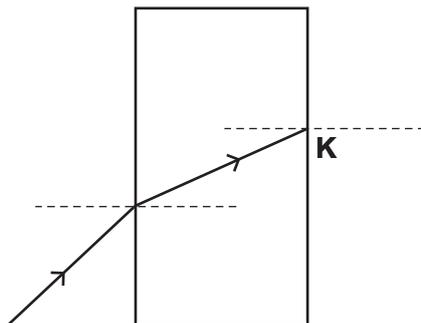

Fig. 8.2

Draw on Fig. 8.2 the emergent ray of light leaving the glass block at **K**. [1]

(c) Fig. 8.3 shows the regions of the electromagnetic spectrum in order of low to high frequency.

radio	microwave	infrared	visible	ultraviolet	X-ray	gamma

Fig. 8.3

(i) An application of the ultraviolet region of the electromagnetic spectrum is detecting fake bank notes.

State an application of each of the following regions.

microwave ....

infrared ....

[2]

(ii) The Sun radiates most of its energy in three regions of the electromagnetic spectrum.

State the names of these **three** regions.

1 ....

2 ....

3 ....

[2]

(iii) List the colours of the **visible** spectrum in order of low to high frequency.

....

.... [2]

(d) The Moon reflects light from the Sun to the Earth.

The Moon is a distance of 380 000 km from the Earth.

The speed of light is 3.0×10^5 km / s.

Calculate the time it takes light to travel from the Moon to the Earth.

time = ... s [2]

[Total: 11]

**9** **(a)** Fig. 9.1 shows an electric kettle used to boil water.

Fig. 9.1

The kettle is connected to a mains supply of 230 V.

The kettle has a fuse in its plug.

(i) Complete the sentences to describe how the fuse protects the kettle against a large current.

Use words from the list.

boil   **circuit**   **cooling**   **freeze**

heating   **kettle**   **melt**

The large current causes a .... effect in the wire in the fuse.

This causes the wire to .... and the fuse 'blows'.

This breaks the .... and prevents the large current damaging the kettle.

[2]

(ii) The power input to the kettle is 2300 W.

Calculate the current in the kettle under normal working conditions.

current = ...A [2]

(iii) Use your answer to **(a)(ii)** to suggest a suitable rating for the fuse in the kettle.

Circle the correct answer.

1 A   **3 A**   **5 A**   **10 A**   **13 A**   **30 A**

[1]

(b) Fig. 9.2 shows an electrical circuit with two resistors in series.

A₁ (A)   (A) **A₂**

20 Ω   40 Ω
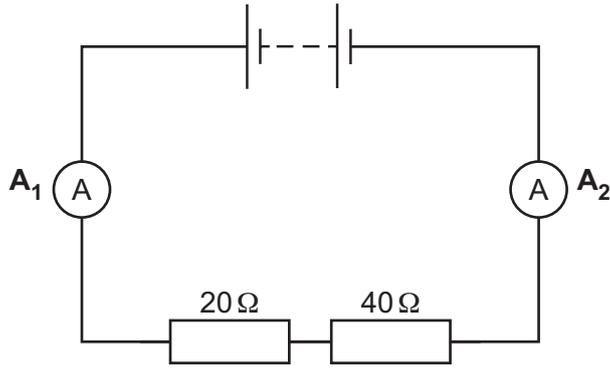

Fig. 9.2

(i) The reading on ammeter **A₁** is 0.10A.

State the reading on ammeter **A₂**.

reading on ammeter **A₂** = ...A [1]

(ii) Calculate the voltage of the battery in Fig. 9.2.

voltage = ...V [3]
