CO-ORDINATED SCIENCES

Paper 1 Multiple Choice (Core)

0654/13

May/June 2026

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **forty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid or tape.
- Do **not** write on any bar codes.
- You may use a calculator.
- Take the weight of 1.0 kg to be 9.8 N (acceleration of free fall = 9.8 m/s^2).

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

This document has **16** pages. Any blank pages are indicated.

1 Which type of molecules make up enzymes?

- A fats
- B carbohydrates
- C minerals
- D proteins

2 The diagram shows a cross-section of a leaf.

Which row identifies the structures in the leaf?

	X	Y	Z
A	palisade mesophyll	spongy mesophyll	stomata
B	spongy mesophyll	palisade mesophyll	stomata
C	palisade mesophyll	spongy mesophyll	guard cell
D	spongy mesophyll	palisade mesophyll	guard cell

3 The diagram shows the human digestive system.

Which letter shows where egestion occurs?

4 Which substances are absorbed by root hair cells?

- A mineral ions and starch
- B mineral ions and water
- C starch and sugars
- D water and sugars

5 The diagram shows some components of blood.

Which row identifies two of these components?

	red blood cell	white blood cell
A	X	Y
B	Y	X
C	X	Z
D	Z	Y

- 6 A person runs quickly up some stairs.

Which row shows the effect on their breathing?

	depth of breathing	rate of breathing
A	decreases	decreases
B	decreases	increases
C	increases	decreases
D	increases	increases

- 7 What happens when adrenaline is released into the blood?

- A** breathing rate increases
- B** pupil diameter decreases
- C** ovary releases egg cell
- D** heart rate decreases

- 8 A person is infected with a pathogen.

The graph shows the number of the pathogen in the person's blood before and after the person starts taking an antibiotic.

Which statement describes the type of pathogen and the effect of the antibiotic on the pathogen?

- A** The pathogen is a bacterium and none of the pathogen show resistance to the antibiotic.
- B** The pathogen is a bacterium and some of the pathogen show resistance to the antibiotic.
- C** The pathogen is a virus and none of the pathogen show resistance to the antibiotic.
- D** The pathogen is a virus and some of the pathogen show resistance to the antibiotic.

- 9 The graph shows the thickness of a woman's uterus lining.

What is the duration of this woman's menstrual cycle?

- A** 10 days **B** 26 days **C** 29 days **D** 34 days
- 10 The allele for red flowers is dominant to the allele for white flowers.
A homozygous red-flowering plant and a homozygous white-flowering plant are crossed.
What are the expected phenotypes of their offspring?
- A** 1 : 1 red to white
B 3 : 1 red to white
C all red
D all white
- 11 Selective breeding is used to improve crop plants.
What does selective breeding involve?
- A** artificial selection
B asexual reproduction
C immunodeficiency
D natural selection
- 12 Which organism is a secondary consumer in the food chain shown?
- A** **B** **C** **D**
plant → herbivore → carnivore → carnivore

13 Which row shows undesirable effects of deforestation?

	flooding	biodiversity
A	decreases	decreases
B	decreases	increases
C	increases	decreases
D	increases	increases

14 Magnesium and chlorine react together to form magnesium chloride.

The particles in magnesium chloride are held together by1..... between2..... .

Which words complete gaps 1 and 2?

	1	2
A	electrostatic attraction	atoms
B	electrostatic attraction	ions
C	sharing of electrons	atoms
D	sharing of electrons	ions

15 What is the molecular formula of the compound sodium fluoride?

- A** NaF **B** NaFl **C** SF **D** SF_l

16 Some changes involving sodium chloride are listed.

- 1 Sodium and chlorine are combined to form sodium chloride.
- 2 Solid sodium chloride is dissolved in water.
- 3 Aqueous sodium chloride decomposes when an electric current is passed through it.
- 4 Solid sodium chloride is heated until it turns to a liquid.

Which changes are chemical changes?

- A** 1 and 2 **B** 1 and 3 **C** 2 and 4 **D** 3 and 4

17 A student draws four diagrams, W, X, Y and Z.

Which diagrams show a correct electrolytic cell?

- A** W and X **B** X and Y **C** Y and Z **D** W and Z

18 Which statement describes an endothermic reaction?

- A** An endothermic reaction transfers thermal energy to the surroundings leading to an increase in the temperature of the surroundings.
- B** An endothermic reaction transfers thermal energy to the surroundings leading to a decrease in the temperature of the surroundings.
- C** An endothermic reaction takes in thermal energy from the surroundings leading to an increase in the temperature of the surroundings.
- D** An endothermic reaction takes in thermal energy from the surroundings leading to a decrease in the temperature of the surroundings.

19 During a reaction, a gas is given off.

Which pieces of apparatus are essential to measure the rate of this reaction?

- A balance and volumetric pipette
- B beaker and stop-watch
- C gas syringe and stop-watch
- D pipette and stop-watch

20 Which row shows the colours observed when universal indicator is added to acidic, neutral and alkaline solutions?

	acidic solution	neutral solution	alkaline solution
A	red	yellow	blue
B	red	orange	yellow
C	yellow	green	purple
D	blue	green	red

21 Which statement about elements in Group I of the Periodic Table is correct?

- A They are metals and get less reactive going down the group.
- B They are metals and get more reactive going down the group.
- C They are non-metals and get less reactive going down the group.
- D They are non-metals and get more reactive going down the group.

22 What are properties of transition elements?

- 1 high melting point
- 2 form colourless compounds
- 3 high density

- A 1, 2 and 3
- B 1 and 2 only
- C 1 and 3 only
- D 3 only

23 Which statements about rusting are correct?

- 1 Oxygen must be present for iron to rust.
- 2 Painting is a barrier method of rust prevention.
- 3 Barrier methods of rust prevention work by reacting with iron and making it less reactive.
- 4 Only water is required for iron to rust.

A 1 and 2 **B** 1 and 3 **C** 2 and 4 **D** 3 and 4

24 What happens in a blast furnace?

- A** Aluminium is extracted from bauxite.
- B** Aluminium is extracted from hematite.
- C** Iron is extracted from bauxite.
- D** Iron is extracted from hematite.

25 Which row shows why filtration and chlorination are used in the treatment of the domestic water supply?

	filtration	chlorination
A	removes bacteria	removes solid particles
B	removes bacteria	removes smells and tastes
C	removes solid particles	removes bacteria
D	removes solid particles	removes smells and tastes

26 What is produced during the complete combustion of ethanol?

- A** carbon dioxide and water
- B** carbon dioxide only
- C** carbon monoxide
- D** water only

27 The structures or names of four compounds are listed.

3 hexane

4 hexene

Which compounds will decolourise aqueous bromine?

- A** 1 and 3 **B** 1 and 4 **C** 2 and 3 **D** 2 and 4

28 A solid object is made from a material with density 0.60 g/cm^3 .

The volume of the object is 4.0 cm^3 .

What is the mass of the object?

- A** 0.15g **B** 2.4g **C** 6.7g **D** 38g

29 Four students lift books of different total weights through different vertical heights.

Which student does the most work?

	total weight of books / N	vertical height / m
A	30	0.50
B	20	0.50
C	30	1.0
D	20	1.0

- 30 The table gives the weight and total area of contact with the ground for each of four animals.

Which row shows the animal that exerts the **least** pressure on the ground?

	animal	weight / N	total area of contact / cm ²
A	beaver	270	220
B	cat	41	29
C	duck	16	72
D	mouse	0.19	0.12

- 31 The vacuum in a vacuum flask reduces the thermal energy transfer from the contents of the flask to the surroundings.

Which methods of energy transfer **cannot** occur in a vacuum?

- A** conduction and convection
- B** conduction only
- C** convection and radiation
- D** radiation only

- 32 A tank contains water.

A wave is produced and travels across the surface of the water.

Which feature of the wave is the maximum height of the wave above the initial level of water?

- A** the amplitude
- B** the frequency
- C** the speed
- D** the wavelength

33 Which diagram shows the refraction of a light ray as it travels from air into glass?

34 When a beam of white light passes into a glass prism, the white light splits up into seven colours.

Which term describes the splitting up of white light into different colours?

- A absorption
- B dispersion
- C emission
- D reflection

35 Which statement about permanent magnets is correct?

- A The magnetic field of a permanent magnet can be switched off.
- B Permanent magnets are made of soft iron.
- C Permanent magnets attract all metals.
- D Permanent magnets remain magnetised when removed from an applied magnetic field.

- 36 A rod gains negative charge as it is rubbed with a cloth.

What happens to the cloth in this process?

- A It gains electrons.
- B It loses electrons.
- C It gains protons.
- D It loses protons.

- 37 The diagram shows four components in a circuit.

Which component is only used to protect the circuit?

- 38 Which nuclide contains the most neutrons?

- A $^{239}_{95}\text{Am}$
- B $^{234}_{91}\text{Pa}$
- C $^{239}_{94}\text{Pu}$
- D $^{238}_{92}\text{U}$

- 39 Scientists use a radioactive source that emits γ -radiation.

What is a suitable safety precaution?

- A Reduce the temperature of the radioactive source.
- B Use aluminium foil to reflect the γ -radiation away from the scientists.
- C Use a paper screen to absorb the γ -radiation.
- D Use the source for the minimum time needed.

- 40 Which list gives the planets in order of increasing distance from the Sun?

- A Earth, Mars, Venus
- B Mars, Earth, Venus
- C Mars, Venus, Earth
- D Venus, Earth, Mars

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (Cambridge University Press & Assessment) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in our Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.

Cambridge International Education is the name of our awarding body and a part of Cambridge University Press & Assessment, which is a department of the University of Cambridge.
