CO-ORDINATED SCIENCES

Paper 1 Multiple Choice (Core)

0654/12

February/March 2026

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **forty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid or tape.
- Do **not** write on any bar codes.
- You may use a calculator.
- Take the weight of 1.0 kg to be 9.8 N (acceleration of free fall = 9.8 m/s^2).

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

This document has **16** pages.

- 1 The diagram shows a lizard that catches an insect by extending its tongue.

Which characteristics of living organisms are shown?

- A growth and excretion
- B growth and sensitivity
- C movement and excretion
- D movement and sensitivity

- 2 The diagram shows a plant cell.

What is the function of the part labelled X?

- A It synthesises carbohydrates by photosynthesis.
 - B It synthesises carbohydrates by respiration.
 - C It releases energy by photosynthesis.
 - D It uses energy for respiration.
- 3 Which small molecules make up enzymes?

- A amino acids
- B fatty acids
- C glucose
- D glycerol

4 Which dietary deficiency causes rickets?

- A iron
- B protein
- C vitamin C
- D vitamin D

5 Which row shows structures that are part of the human circulatory system?

	arteries	bronchioles	valves
A	✓	✓	✓
B	✓	x	✓
C	x	✓	x
D	x	x	✓

6 What is a pathogen?

- A a disease caused by an organism
- B a food item that causes a disease
- C a disease caused by a drug
- D an organism that causes a disease

- 7 A student investigates gas exchange using the apparatus shown.

The student breathes in fresh air, then breathes in and out through the mouthpiece of the apparatus. This is repeated a few times for two minutes.

Which row shows the appearance of the limewater in X and in Y after two minutes?

	X	Y
A	milky	milky
B	milky	colourless
C	colourless	milky
D	colourless	colourless

- 8 The diagram shows an outline of the human nervous system.

Which parts make up the central nervous system?

- A** R, S and T **B** R and S only **C** R only **D** S and T only
- 9 Three types of human disease are listed.

- 1 bacterial infections
- 2 coronary heart disease
- 3 viral infections

Which diseases can be treated with antibiotics?

- A** 1 and 3 **B** 1 only **C** 2 only **D** 3 only
- 10 Which row identifies some features of wind-pollinated flowers?

	anthers hanging outside petals	feathery stigma
A	x	x
B	x	✓
C	✓	x
D	✓	✓

11 Which statement about human gametes is correct?

- A All egg cells contain an X chromosome.
- B All sperm cells contain a Y chromosome.
- C All egg cells contain X and Y chromosomes.
- D All sperm cells contain X and Y chromosomes.

12 Which row shows the primary source of energy for an organism?

	organism	source of energy
A	carnivores	dead plants
B	decomposers	living plants
C	green plants	sunlight
D	herbivores	animals

13 Which row shows undesirable effects of deforestation?

	flooding	number of species
A	decrease	decrease
B	decrease	increase
C	increase	decrease
D	increase	increase

14 A few drops of petrol are dropped onto the floor on one side of a room. A short time later, someone on the other side of the room smells the petrol.

What is the reason for this?

- A The petrol flows over the floor to the other person.
- B The petrol evaporates and then condenses.
- C Petrol molecules dissolve in air molecules.
- D Petrol molecules diffuse to the other side of the room.

15 Which row describes an atom of phosphorus, $^{31}_{15}\text{P}$?

	number of electrons	number of protons	number of nucleons
A	5	15	16
B	5	16	31
C	15	15	16
D	15	15	31

16 Which row describes what happens in an endothermic reaction?

	transfer of thermal energy	temperature of the surroundings
A	to the surroundings	decreases
B	to the surroundings	increases
C	from the surroundings	decreases
D	from the surroundings	increases

17 Which changes are chemical changes?

- 1 the burning of magnesium
- 2 the melting of sulfur
- 3 the rusting of iron
- 4 the reduction of iron(III) in iron(III) oxide

A 1, 2 and 3 **B** 1, 3 and 4 **C** 1 and 3 only **D** 2 and 4

- 18 Calcium carbonate is added to dilute hydrochloric acid in a conical flask. Carbon dioxide gas is produced.

Which methods are used to investigate the rate of this reaction?

- 1 Connect the conical flask to a gas syringe and measure the volume of carbon dioxide collected every 15 seconds.
- 2 Place the apparatus on a balance and measure the mass every 15 seconds.
- 3 Measure the volume of hydrochloric acid in the flask every 15 seconds.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only

- 19 Ammonia and sulfur dioxide are bubbled into separate samples of water.

What are the pH values of the resulting aqueous solutions?

	aqueous ammonia	aqueous sulfur dioxide
A	greater than 7	less than 7
B	greater than 7	greater than 7
C	less than 7	less than 7
D	less than 7	greater than 7

- 20 Which row describes the trends shown by Group I elements down the group?

	melting point	reactivity with water
A	decreases	increases
B	decreases	decreases
C	increases	increases
D	increases	decreases

21 Which statement describes the element chlorine?

- A** It is a diatomic metal.
- B** It is a diatomic non-metal.
- C** It is a monatomic metal.
- D** It is a monatomic non-metal.

22 Which statement about alloys is correct?

- A** Brass is a compound that contains copper and zinc.
- B** Brass is a mixture of copper and iron.
- C** Stainless steel is a compound that contains iron.
- D** Stainless steel resists rusting.

23 Which statement about the treatment of the domestic water supply is correct?

- A** Sedimentation is used to remove microbes.
- B** Filtration is used to remove dissolved solids.
- C** Chlorination is used to kill pathogens.
- D** Carbon is used to change the pH.

- 24 The pie chart shows the composition of clean, dry air.

Which row identifies W, X and Y?

	W	X	Y
A	nitrogen	other gases	oxygen
B	nitrogen	oxygen	other gases
C	oxygen	other gases	nitrogen
D	oxygen	nitrogen	other gases

- 25 The displayed formula of a molecule is shown.

How many covalent bonds are formed by the carbon atom in this molecule?

- A 1 B 2 C 3 D 4

- 26 Which fraction obtained from petroleum is **not** used as a fuel?

- A bitumen
B gas oil
C gasoline
D refinery gas

27 Ammonium chloride is mixed with aqueous sodium hydroxide and heated. A gas is produced.

The gas is tested with damp blue and damp red litmus paper.

Which row shows the observations?

	blue litmus	red litmus
A	bleached	bleached
B	turns red	unchanged
C	unchanged	turns blue
D	unchanged	unchanged

28 The graph shows how the speed of a car varies with time.

What is the distance travelled by the car?

- A** 30 m **B** 50 m **C** 60 m **D** 80 m

29 The diagram shows two teams pulling in opposite directions on a rope. The magnitude and direction of the force exerted on the middle of the rope by each team is also shown.

What is the resultant force on the middle of the rope?

- A** 150 N to the left
B 150 N to the right
C 3850 N to the left
D 3850 N to the right

- 30 A cylinder of weight W and cross-sectional area X exerts a pressure P on the ground.

Some changes are made to W and to X .

Which row shows a situation that produces the same pressure P on the ground?

	W	X
A	doubled	doubled
B	doubled	halved
C	unchanged	doubled
D	unchanged	halved

- 31 The graph shows the temperature of a sample of gas as it is heated and cooled over a period of time.

At which point on the graph do the particles of the gas have maximum kinetic energy?

- 32** An equal quantity of water at 80°C is poured into each of four identical metal containers on a laboratory bench.

The outer surfaces of two of the containers are dull and the outer surfaces of the other two containers are shiny.

Identical lids are put on two of the containers.

All the containers are allowed to cool.

Which container cools at the greatest rate?

- 33** A water wave travels at a steady speed of 4.0 m/s and passes a stationary boat.

Four wave crests pass the boat every 2.0 seconds.

What is the wavelength of the wave?

- A** 0.5 m **B** 1.0 m **C** 2.0 m **D** 8.0 m

- 34 The diagram shows light passing through a thin converging lens.

What is the distance X ?

- A the distance from the lens to an object
 - B the focal length of the lens
 - C the principal focus of the lens
 - D the wavelength of the light
- 35 Four sound waves, P, Q, R and S, have the frequencies shown.

sound wave	frequency / kHz
P	0.30
Q	3.0
R	30
S	300

Which sound waves are ultrasound waves?

- A P, Q, R and S
 - B Q, R and S only
 - C R and S only
 - D S only
- 36 There is a current of 0.60 A in a 33Ω resistor.

What is the voltage across the resistor?

- A 0.018 V
- B 12 V
- C 20 V
- D 55 V

37 There is a current I in a resistor when the voltage across the resistor is V .

How much energy is transferred in the resistor in time t ?

- A IVt B $\frac{V}{It}$ C $\frac{I}{Vt}$ D $\frac{VI}{t}$

38 What is **not** a hazard when using a mains supply?

- A damaged insulation
B damp conditions
C excess current
D double-insulated outer casing

39 Which statement describes α -particles?

- A They are negatively charged and strongly ionising.
B They are negatively charged and weakly ionising.
C They are positively charged and strongly ionising.
D They are positively charged and weakly ionising.

40 Which list gives the planets named in order of distance from the Sun?

- A Earth, Mars, Venus, Jupiter
B Mars, Earth, Venus, Jupiter
C Venus, Earth, Jupiter, Mars
D Venus, Earth, Mars, Jupiter

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (Cambridge University Press & Assessment) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in our Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.
